

# SEBUMOL LPC RSPO-MB

## Skin conditioning and moisturizer

### Chemical composition

Lauryl ester of PCA

|                  |                                     |
|------------------|-------------------------------------|
| INCI name:       | Lauryl PCA                          |
| Appearance:      | colourless to pale yellow, wax-like |
| Ionic character: | nonionic                            |

### Typical data

|                       |                    |
|-----------------------|--------------------|
| Active ingredient:    | 100 %              |
| Water content:        | 1 %                |
| Acid value:           | max. 15            |
| Saponification value: | 210                |
| Iodine colour number: | max. 3             |
| Solubility:           | insoluble in water |

### Application

SEBUMOL LPC RSPO-MB is a soft solid wax at room temperature with a melting point slightly under body temperature, which means the product melts on the skin. SEBUMOL LPC RSPO-MB can be used in moisturizing creams and lotions, moisturizing syndet bars and hair rinse.

SEBUMOL LPC RSPO-MB significantly reduces the stickiness of lipstick and lip-gloss bases, increasing their distribution and spreading properties.

The recommended dosage of SEBUMOL LPC RSPO-MB varies between 0.5 – 5 %.

### Storage

Store in a cool and dry place. Product will turn liquid at temperatures above approx. 35 °C. Close opened containers tightly after use.
